

MARCAP DISPATCH

EXTRA

Special September 11<sup>th</sup> 1961 Edition

\*\*\*\*\* The Marcap Dispatch \*\*\*\*\*

Published monthly @ The Center of Awareness, Lake Rabun, Lakemont, Georgia.

Publisher: Marcap Council, Inc.

Editor: Ed O'Neal

Printer: William Lapp

Subscription rate: 3.00 per year or two years for 5.00

Purpose: To establish and maintain communication with those interested in the work of Marcap Council, its memberships, and its goals.

Dedicated to: YOU who have seen a glimpse of the truth, to YOU who seek, and to YOU who help support our work through your membership.

\*\*\*\*\*

Editorial

Knowing for some time that Russia planned to renew nuclear tests we have had many conferences here at Marcap Council headquarters. At these conferences our Executive Director, Dr. E. Blanche Pritchett has given us much information regarding 'fall out' effect, purpose, protection, safeguards, etc.

The article herein was planned for the next issue of the Dispatch but due to the urgency of the situation it was decided to get out a special edition of the Dispatch. The Marcap Dispatch is our organ of dissemination and we felt we could reach all of our subscribers and members and friends soonest this way. We hope you appreciate, can and will use the information herein.

For those of you who read the "Michael Speaks" column this is under that heading.

We have over 10,100 names on our mailing list in addition to our members and subscribers. Only members and subscribers and personal friends are getting this edition. We would like everyone to get a copy. Our funds for dissemination are limited so if you would like to see others get this edition send us a contribution toward this, no matter how small.

Also, if you have names of friends you would like to have a copy, send them along with your contribution. There is much more information on this subject that time does not allow us to cover now, so I suggest if you want more information, write:  
Dr. E. Blanche Pritchett, Marcap Council, Inc., Lakemont, Georgia.

Isaiah 24: verse 6 and 17

Therefore hath the curse devoured the earth,  
and they that dwell therein are desolate:  
therefore the inhabitants of the earth are burned,  
and few men left.

Fear, and the pit, and the snare are upon thee,  
O inhabitant of the earth.

Some TRUTH about Radio-activity and Fall Out  
by

E. Blanche Pritchett, Executive Director

The subject of radio-activity is again very popular, and it can be noted that the very same Scientists who loudly objected to Nuclear Tests in the atmosphere a few short years ago, are now soft-peddling that subject and will not make definite statements about the dangers when asked by a well-meaning news commentator or reporter. WHY?

The Political heads of this planet and the propoganda they produce have reached a tacit agreement not to propogandize the dangers of Fall Out. WHY?

It is considered that the damage can be done secretly, and it is known that "Once done, there is NO undoing". That's why!

Well, Marcap Council has done extensive probing into this subject, and now we have some answers which will not reach much agreement from the Nuclear Boys.....or Political factions.

The entire action of fissionable materials is to activate compatible particles. This is done by the simple physical law that no two objects may occupy the same space, and this is an axiom agreed upon by all of the scientific heads of the planet. Action takes place by the fissionable materials seeking their counterparts, which go to make up the so-called 'solids' of the physical universe, and upon finding them, ~~trying to connect with them so closely as to~~ occupy the same space. This is a PROCREATIVE act. The sex act is a dramatization of two objects trying to occupy the same space, and in so doing, an explosion occurs, and a new product is created.

I stress the PRO-creativeness of contact and connection between counter-parts, rather than, as most authorities will agree upon... the destruction factors. Every created thing is placed into motion, space and time by a Nuclear Fission action, which has never been revealed upon this planet until now, and is properly revealed through the creative body of the first-born, who ARE the Council of this planet and this solar system.

It would be very easy for me to write a few million words on this subject, but at this writing I am aiming at a specific thing that I wish to make known to all readers of our Dispatch and all members of the Council, and that specific thing is FEAR.

Fissionable materials that are man-made contact the electrical field of a human body, and set into motion the particles that go to make up memory, and forms. The forms can be changed, they can be altered into more ugly or more beautiful forms, depending upon the awareness and ability of the spirit in charge of the body.

The Genetic entity, which is the body, has been subjected to intense radiations throughout time and space and in other civilizations upon this very planet, and there is a built in alarm system which warns

of de-materializing dangers. A de-materialized body is dust, and the Genetic intelligence warns the physical body machinery of this, and from the body a particle is released...(emoted, emanated, sent out) which creates friction in the field of the body and thermal memories are activated. Chills and fever, nausea are symptoms of this action. (Have you ever experienced real fear? If so, you know the claminess or heat of the body which is experienced.)

Now follow this, it is tricky, and your own body may be unwilling for you to get this very clearly. Fissionable material enters the field of the body. The body emanates fear, and sends it out..... through the field....In the field are mental image pictures (memories) of past Fear, and these too, are stimulated into action and then emanated out into the atmosphere.

The combination of Fears and the reasons for them are not of import here except to say there is utter confusion as to what there is to be afraid of, and this results in psychosis. Paranoia, (Something is after me, or watching me, sort of thing.)

I tell you now, cleanly and clearly, that you do not have to buy the idiotic warnings or threats being sold about radio-activity.

Here's why.

If we can practise non-resistance, we can win. This means that one should do all within his power to permit what is, to be so, without criticism, which is a compulsion to change things.

If it were not for the resistance the body puts up to the Gamma rays, they would go right on through the body and there would be no ill effect. But, due to the alarmists, and the stupid, information is accepted, and we make our own misery in the acceptance.

Train yourself to willingly accept the particles of fall out, and know that it is possible to renew our forms with this new material, which can replace the old, the diseased, the aberrative, the mental blocks, and all other resistive masses we have in the field of the body.

A protective shield is as deadly as the executioners ax, did you know that? Do not consent to the fear, or "Need of protection" propoganda, for if you do, you are removing your name from the book of life.

What is there to protect ourselves from.....renewing elements? Revitalizing energies? Radial therapy?

Fall out can serve as food to the body and the mental field if you will but look this over. Conscious release of impotent materials could take eons, for it took that long to accumulate it..... Conscious release of masses which result in emotional disturbances could take eons, for it took that long to accumulate it. Conscious release of blinding elements could take eons, for it too that long to accumulate it.

WE CAN PUT MAN-MADE radio-activity to work for us, it IS for us, not against us. If it were not for the actual hunger we have for these elements.....so-called 'fissionable elements' they could not harm anything. But the hunger is so great that the appetite goes crazy. It is like the old maxim: "If a little bit is good, a whole lot is better." And by this, bodies will return to dust, for there is such a thing as TOO MUCH.

If you wish to be a rock, or a grain of sand, that is your right, but I do not think many of us entertain that wish, or if we do, it is because of our own apathy and considered weakness. All of which is balder-dash!

There are some of us around who remember when Nuclear Fission was discovered on the planet Meldech, and we know that those who escaped the disintegration of that planet were those who we could call Spiritual releases, and their escape was certain....they are here now to prove it, and to lead the way through the most troublesome times since this planet came into existence.

Marcap Council has been very alerted to the "use of materials postulates" and how most people today clutter their own beingness with NEEDS, WANTS, or Gotta Haves. And the intended use of materials is forgotten in the desire to gain or gather or accumulate things, money, etc.

Well there is a Right 'use of materials' and there is a wrong one, believe it or not, and the right could be said to be: the use which is shared. The wrong use is the selfish use. It is basically as simple as that, but try to pry a few dollars loose from someone.....try to encourage them to contribute to such work as ours, and see how little is given. And, all the time, the things which are held on to, are forming into eternal tombs, for the covetousness of man makes him into a solid mass eventually, and he BECOMES immobile!

What does this have to do with radio-activity? I'll tell you what!

Man's covetousness of bodies is ridiculous! There is no scarcity of bodies, and the very fear of loss of body is the losing postulate which makes it so. If you have fear of losing your body, then you better get yourself wised up to the mechanisms of fear, death and ignorance.

On the other hand, if you think there is nothing you can do about it.....find out where you got that idea. I'll bet it came from Soviet influenced propaganda. "The nothing you can do about it postulate" is the postulate of a dying civilization. The postulate of Apathy.

NOW HEAR THIS! Every element which is used in the construction of a body is found in Fall Out! Right use of fall out, and right acceptance of it is a rejuvenating potential for bodies. Wrong use is fatal, and wrong use is: too much, or not enough. Now you must learn how much is enough, and I can tell you about that too.

Be willing to have the fall out, and the form will use what it requires. If you resist....you add too much....if you desire more than your share, you add too much. If you think it deadly you will not accept any.

The physical universe is made up of Fluids, gases and solids, and their use in correct amounts must be rehabilitated into the forms. There is a need to look at this....for you. We have looked at it, and now have the answers.

If you wish more information on this, then get busy and write me, for I will not force survival information on those who would die. I will not insist on survival for anyone, nor will I put information into the hands of the idiots who would make light of it. There are some who know I have the answers, and they will ask, and they will do something about it. Those who would ask for curiosity's sake will shun the information and do nothing about it, and I am too busy to try to separate the sheeps from the goats, I prefer they do it themselves.

As a final note on this bulletin, I will say this: as fall-out makes holes in the field of the body, illness and death, and deformity result. We can tell you how to repair those holes, but we cannot do it for you. If you ask for the information.... and do not use it.....then we will all be better off without you, for you have it planned that way anyhow, and we will fight for your right to follow through on your own demise, if you really want it that way....or we will fight for your right to live and rejoice, if you are one of ours who has it planned THAT way.

We have come to two ways.....no more, no less.....which will you choose?

This is an apparent end to this bulletin, if you let it be.

REMEMBER ! We have a "Letters To the Editor" column. This has been requested and we are very happy that this much interest has been stimulated. As long as your letters will pass postal inspection, they will be printed as they are received and not altered. If, however, they are unprintable they will not be used. If we receive more letters than we have space allotted for letters, we reserve the right to choose which letters we will print. All letters become the property of Marcap Council, Inc. and will not be returned.

LET US HEAR FROM YOU. Address all letters for this column to "Letters to the Editor."

\* \* \* \* \*

To submit articles for the Dispatch, type, double space, on 8 1/2 x 11 white paper with generous margins. Any articles that might be used are subject to editing, if necessary, by the Editor. If the articles are to be returned, be sure to include a stamped, self-addressed envelope. Send them To Editor, Marcap Dispatch, Lakemont, Georgia.

Everything received will be given careful consideration.

The Editor

Marcap Council, Inc., Lake Rabun, Lakemont, Georgia. Phone: Clayton 5662

Marcap memberships are now available, and cards will be issued for:

Associate/ visiting member - Initiation fee \$10.00 Annual fee \$5.00  
Participating member - - - - Initiation fee \$100.00 Annual fee \$10.00

The total Founding Membership roles will be limited to 144 members.

Participating Member - - - This entitles one to 33 1/3% discount on all services available at Marcap.

All annual fees are for the year and are due by February 15, the year following application. If the annual fee is not paid by due time, new application must be made.

All members will receive the Marcap Dispatch monthly.
