

94 Rowman Ave.
New Miami, Ohio
Jan. 11, 1953

Dear Friends;

This is my means of introducing myself to your dianetic communications net. I am Bill Hamilton, from New Miami Ohio, this is a small suburb of Hamilton Ohio. When I tell someone where I am from I usually say Hamilton, then someone sees the address New Miami and says how come. I have lived in Hamilton most of my life and so more or less out of habit still give Hamilton as my home.

Any resemblance between my grammar, spelling, or punctuation, and that taught in school is purely coincidental, I am still rebelling against school.

I am 35, married, have five children, am employed as a chemist, hobbies are many and varied- like to fish(bass) dabble in photography (so far have failed to produce a work of art)- dabble in electronics, build a few gadgets etc. I have worked at a number of jobs; dishwasher, salesman, bill collector refrigeration and radio serviceman, and have been in charge of a small production control lab in a road tar plant for the last eleven years.

Have been in, on or around dianetics ever since the first article in Astounding. Had over 150 hours of processing by old "standard procedure" and have audited more than that. I am not an H.D.A. but have attended Hubbard's lectures on effort processing and advanced procedure which he gave at the conferences in Wichita in the fall of 1951. At present am not auditing or being audited, have to overcome some internal resistances before formal auditing will work.

I am getting ready to become more active, that is one of my purposes in starting increased communication. There are so many apparently different techniques going the rounds that I want to find out what is working for whom. Personally I have the beginnings of a notion of what all of the techniques have in common but it is still too nebulous to communicate.

I still don't know the full aims and purposes of this network so if each of you can and will take the trouble to drop me a line telling me your ideas of what it is for I will appreciate it very much.

I would like very much to use tape to communicate with any of you who are able and willing to use this medium. I have a Pentron model 9T-3C machine which records at either 3 3/4 in./sec. or 7 1/2 in./sec. dual track, so if you will communicate this way please let me know.

hoping to hear from you soon I'll sign off for now

Yours for ARC

William C. Hamilton
