COMMUNICATION

607 South Kenmore Avenue
Los Angeles 5, California

February 14, 1957

Dear Friends:

Thank you for the nice letters. Several of you sent your best wishes to Laeta. She's getting along fine. Been taking it easy - - only 10 hours a day, but we're expecting she'll be back to her usual 14 pretty soon. Her auditing and teaching goes merrily on.

Perhaps the biggest news on the Dianetic front is the recent organization of the INTERNATIONAL DIANETIC SOCIETY. Some of you may have received a communication from A. E. van Vogt telling about the proposed organization. The dues are \$1.00 per year, and memberships are coming in from all over the world. The first publication has just been prepared and mailed. If you're not already a member or on the list, let us know and we'll have something sent to you.

Another CADA project is the Professional Meetings. These meetings are being held once a month and are for professional members only. Techniques and professional matters are discussed. The **theory** is that we can all let down our hair and tell about our failures as well as our successes. We expect to exchange data and help each other. The next meeting is to have as the main topic, Psychodrama. Dr. L. C. Anderson will be the leader and we expect to have some demonstrations. The next meeting will be on Effort Processing and its developments. We will have case histories and reports of the effectiveness of Effort Processing techniques by various professional members.

Wayne was the principle speaker at the last CADA regular monthly meeting. His topic was "Basic Principles of Psychotherapy". He gave his concept of the theory and philosophy underlying Dianetic processing and other principle forms of psychotherapy. He brought in the theory of learning and its application to psychotherapy, and attempted to cover, in about an hour, the works of several of the major schools over the past 50 years!

Four candidates took the CADA examination for auditor on January 15th. All were certified and received their irrevocable "sheepskin" at the February meeting. The certificate read "Dianetic Auditor", and it is the opinion of many that this certificate will be the most valuable in the field in time. Several others have already made application and expect to take the examination on April 15th.

A group of CADA members who have incorporated under the title, "Modern Associates Publications" (MAP), have just published a book titled, EFFECTIVE PROCESSING TECHNIQUES, Vol. 1. There are articles

ARC . 2

by seven auditors, and in our opinion most of them are very good. The book sells for \$2.50 (plus .10¢ tax in Calif.). If you want a copy let us know and we'll mail it to you.

The "12" is going merrily along and has conducted experiments in hypnosis, ESP, and the Eeman Circuit. If you don't know what the Eeman Circuit is we refer you to the book titled, COOPERATIVE HEALING, by L. E. Eeman. It deals, according to the author, with the curative properties of human radiations. The trick is to place a cooper screen, about one foot square, under your head and one the same size under the base of your spine (or fanny). From each of these screens you run a cooper wire to an electrode. If you are right handed you are to hold the wire from your head in your left hand, and from your spine in your right hand. If left handed, reverse it. Also you are supposed to cross your feet. The theory is that you will experience considerable relaxation in from 15 minutes to 45 minutes time. Our experience has been that some people get restimulated and actually dramatize engrams. The answer to this is apparently more Eeman Circuit. At least one more, and maybe two more sessions, spaced possibly a day apart. There is a great deal more to it for anyone who wishes to get the book and read it. Since we are still experimenting we prefer not to give a report on our findings just yet.

Some of our friends have reported startling results. For example, the writer, Robert Moore Williams recently told us of a series of experiences that he has had through experiments which are to say the least "interesting". If any of you have been using this we would really appreciate a report from you.

The legal situation in California is probably coming to a head. The legislature is currently in session and we believe that a bill will be passed. You may have seen wayne's recent article in the ABERREE, but in a nut-shell: The California State Psychological Association, with help from the AMA is attempting to put out of practice all Dianetic and Scientology auditors in California. Of course, they're attempting to put out of practice a lot of other people, all of whom they label "quacks". ALCAF has a constructive program and some very good representation in the legislature, and we hope for a bill favorable to us.

Dianetic people still move around. Our last word from Waldo Boyd gave his address as: 9364 Greenback Drive, Orangevale, California. We think he'd enjoy a letter from you.

ARC . 3

And a letter from Anna Selecman:

"We are always happy to hear from you but please don't feel that you should write to us at any set time. We, your students, don't write often, so just write when it is easy for you to do so.

"We are sorry about Laeta's illness, but are sure she will recover soon. Does she accept life as it comes to her, or does she actively do things that make her happy? Is life thrilling? If not, what is holding her down?

"Life for me is a thrilling experience since I have unloaded my anxieties and give my best in everything I do. A higher power seems to take over. The struggle against pressure vanishes.

"We have to make Dianetics work, have to recognize old patterns and break them to be free. My best to you both."

Charles Phillips writes:

"I went to the Radiation Congress in Wash., D.C. I feel it was very worthwhile and an excellent Congress. I plan to go to the one in June and will tape a report on that one also.

"There are many fields to be explored and much work to be done. I have been working on education and how we can get into education and feel we finally can do it now. With the new work I have done I think we have the answer as to why we have failed in the past and what to do so as to not fail again in the future. I plan to tape this and if you are interested let me know."

Sure do want to get your report as to why we have failed and how to avoid it in the future. Please don't forget.

Sincere ARC,
