

## ANOTHER EXTRA-SPECIAL HOWES ANNOUNCEMENT

The other day, we received a short tape from Ron Howes. It is a tape designed to give the latest processing techniques, as designed and applied by Dr. Howes. In this tape, he expounds "The Self-Determined Emotion Technique," "The Single Word Technique," the "Action-Exhaustion Technique," and a "Reality-Maintenance-Drive Technique." The "Mirror Technique" is also described.

These techniques can be used either by an individual for self-processing, or by the professional for assisting others. The transcript of this tape will be given FREE to those who have ordered the Basic Course previously, or to those who order the Basic Course with this letter. To all others, the cost of this transcript will be \$1.50. (The FREE offer will not be extended to those ordering the Course in parts at separate times.)

This additional Free bonus to buyers of the BASIC COURSE means that those who have already ordered the complete course will receive both the bonus Lesson on "How to Use Awareness", PLUS the new Howes' tape transcript. Mailing will begin shortly after this letter is out, on Part One of the Course. We hope you like it!

### WHAT IS YOUR INTEREST ???

A great deal of coordinating is being done toward the stabilization of techniques. This coordination is encompassing a large number of fields and a great many people. Much is being learned and worked into place, and much is being re-discovered which previously had existence. As the function and true nature of aberration becomes known, techniques become possible for overcoming the more and more basic causes of trouble. This data is coming from all over the world.

The Eidetic Foundation has been doing practical research in the new methodology. The newer techniques are being based upon entirely new principles, which mean greater speed in reaching the desired goals. As a consequence, we wish to know if you are interested in our publication of a new paper correlating these techniques, which will be called "Sensation and Tension Processing." Price on it would be \$2.00. It is NOT written yet, however. Please do not order it yet. Just let us know what your interest in the matter is.

John B. Lewis has promised us a mass of data and material for dissemination. If we are to judge what the material might contain, we might conclude that it will be concerned with the spiritual and mental side of man more than the physical, and that the techniques will be directed toward integration from the mental side to the physical. Thus the material would be quite different from most of the techniques we have been using up to now. Would you wish us to publish this? Are you interested? Let's hear from you then.

Here is one of the fascinating books you'll ever read. Presented for the FIRST TIME is an explanation of how Christ performed many of his miracles... walking on the waters, changing water into wine and rolling away the stone. Here also is a simple explanation of how you can master such amazing feats as actually moving objects -- from a feather to a jet bomber -- without touching them -- USING ONLY YOUR MIND! Even if you never have the courage to attempt these seemingly impossible acts, you'll certainly want to read how others have done them and ARE doing them even today. Price \$2.00

## SERMON ON THE MOUNT

Here is one of the most rewarding, stirring, warm and human treatments of what Christ said that has ever been brought to light. And what makes this book enjoyable, even doubly enjoyable is the way it is presented. Every word that was said, every question that was asked -- AND ANSWERED -- in a group discussion among Rev. Welgos and his students about the Sermon on the Mount has been captured here with all of the spontaneity and flavor of a friendly evening of home entertainment. This book not only shows you what Christ meant in his most important sermon, but opens up an entirely new way of life. More than any one book, this one contains more secrets on how to GET WHAT YOU WANT than any other ever written! Price \$2.00
