

?? WHAT IS NEXOLOGY ??

Nexology is a new science which is integrating the truths of the ancient sages with our present-day scientific advancement. The word "Nexology" is a combination of Nexus (meaning a tie, connection, or relationship), and -Ology, which refers to study. "Eidetic Nexology" (eidetic means exceptionally vivid recall) is the study of human memory and the inter-relationships which affect the individual.

There are many branches of Nexology, such as Familial Nexology, Industrial Nexology; Philosophical, Political, etc.

The Eidetic Foundation began as a small group studying human memory, and the factors which caused it to deteriorate with ageing. In the course of investigation, it was found necessary to discard all previous dogma concerning memory. It was decided that a completely fresh start would be necessary. As a result of leaving all previous theories out of our work and beginning afresh, a great many major discoveries were made.

Some of these discoveries were so startling in terms of therapeutic results, that the question arose as to how this knowledge could best be presented to the public and benefit mankind in the fastest possible manner. It was decided that we would encourage the establishment of groups across the country -- groups of people interested in the study of our material for self-improvement. But how, it was asked, are such groups to be started; and how can they be kept growing?

For technical reasons, the best course of action appeared to be the publication of our work on three different levels:

- 1) The Dollar Series, to help people through small books aimed at specific ailments. We felt that this would be the quickest way of giving people a non-technical piece of information about themselves. If they liked it, and wanted more, they could then study -
- 2) The Basic Course in Nexology. This comprehensive material contains more solid truth, but retains a lay presentation. It is designed to aid anyone desiring to begin the re-establishment of the eidetic recalls they once had as children. The study of this material readies aspirants for the last step -
- 3) The Philosophical Course. Here we blast away all personal limitations with the undiluted dynamite of truth. This course is capable of taking a person from his present state of existence to a greatly superior state of being which we call "optimum". An optimum individual is fully capable of using his entire being for the accomplishment of his life-purposes. In so doing, he becomes as nearly perfect, mentally and physically, as he wishes. He has full control of every cell in his body, and consequently of every organ, muscle, nerve, blood vessel, and piece of tissue comprising his physical component.

The state of optimum, incidentally, is the golden state of existence aimed at by the Yogis, Rosicrucians, Theosophists, and all mystery religions. There is a difference, however.

The difference is that our knowledge has advanced to a point where the result is much more rapid than heretofore possible. Achievements ordinarily requiring 20 or 30 years of study and concentration are now possible, in some cases, in a couple of years -- or even less!

Not unexpectedly, our search for truth concerning human memory has taken us into some very strange quarters. But the results have been well worth the effort which went into our quest. More than 1,500 people have been contacted and have had experience with our work to this date. Some have fallen by the wayside, unwilling to make the small effort involved -- others, however, have applied our knowledge and have risen to fantastic heights. The knowledge has now become a well-integrated field. Our facts are so solid that one can literally build a house on them -- to give the shelter of secure knowledge and a better way of life that all are seeking.

Our work is NOT hypnosis, for this deals with lowered awareness of self -- the reverse of what WE seek. It is NOT psychoanalysis, for this is concerned with a very short-term goal compared to our higher and more permanent one. Neither is it psychiatry, as this also deals with short-term goals and employs methods destructive to awareness. It is NOT dianetics, as this presents considerable social illusion which often has caused individuals to reject responsibility for themselves. It is NOT a religion, since religions deal with subjects outside the scope of our present work. (We have, however, found much truth in the New Testament, which is to be analyzed in a work being planned.)

Our goal is to develop each student's memory into the tool it should be, and once was. This means Eidetic Recall -- the type of memory possessed by every healthy young child. Another name for it is Sense Memory, wherein one is able to utilize the recordings of every moment of his existence at will.

We teach one to develop control over his memories (and thus his whole being) by locating in his past the various acceptances and agreements which cause him to be less than optimum. This means a re-evaluation of the untruths in which he is presently maintaining a belief. At first, we re-establish the student's control over himself by showing him how to regain control of his own body and its various parts. In the Philosophical Course, he will be shown how to re-establish control over his own mind, and all of its fantastically diverse and wonderful capabilities. In gradual stages, he can become a fully integrated personality. And ALL of this, mind you, from a search for HOW human memory functions!
