Swedish language. The Swedish National Social Welfare Board
has issued a statement to the effect that scientology is not to be
regarded as a method for treating drug abuse. Scientology is
neither a recognized scientific discipline nor a religion, but
instead an amorphous jumble of the obvious and the absurd.
Like similar teachings and movements, scientology involves
some risk because it attracts the mentally unstable. It constitutes
a special risk in the case of drug addiction, where it is touted as a
means of rehabilitation.
