

THE SECOND TERMINAL

NUMERO 39

Franklin S. Sullivan, D.Son.
Entrepreneur

JURISPRUDENCE ISSUE

There has appeared, in late summer, 1962, in a small pamphlet, printed at irregular intervals, and which calls itself, "Ability," published and printed by the Hubbard Association of Scientologists, International, 1812 19th St. NW, Washington D.C., a foul slander disparaging the abilities of and defacing the character of one Frank Sullivan, whom it can be well demonstrated is none other than Franklin S. Sullivan, D. Son., Entrepreneur of the 2nd Terminal. It is of the unanimous opinion of Counsel that, in the light of facts, the utterance of such general, broad, unqualified derogations in published, public issue is totally undefensible, in suit, in a court of law.

I assure you that this matter will not be taken lightly. My actions, however, will be tempered-- temporarily at least--by the fact that I am now of the feeling that such a suit would bring public disrepute, not only to Hubbard's Witnesses, Hubbard & Co., Hubbardism-- but would do foul damage to the free science of Scientology. The public would not make the above differentiation in the yellow and pink press. Powerful interests with loaded guns, barrels full of damaging evidence, which they have long been accumulating, would just love to have someone else pull the trigger so that they could blast off.

Of course, anyone who well knows me, is fully cognizant that I am a believer in the law of the jungle. I worship the spirit of revenge: an eye for an eye; a tooth for a tooth; a titties for a tattie; a semicolon for a semicolon. I still intend to take appropriate drastic measures, that my honor might be avenged. In my present vicious and dolorous frame of mind, which has no bearing on how I might feel next week, I have after lengthy conference and consideration determined a punishment in kind for this heinous crime. Hereinafter and forthwith the names of those responsible for, connected with, or accessory to this libel, will be printed, 100%, wholly, in lower case letters thruout. Yea, and to add my further insult to my injury, and to further satisfy my honor, all periods following initials will be omitted.

So-- take that, dr l ron hubbard; and that, eleanore turner. Now, succumb! You won't? Oh Fudge!... I mean oh fudge.

You see, this silly business started when one of my preclear's baited dr l ron hubbard with some kind of a fool letter telling him how naughty, or something I was. Then when dr l ron hubbard replied, saying that being audited by Frank Sullivan was like committing suicide. What burned me up was that he forged the signature. He signed it "RON." Ron would say that a Thetan can commit suicide? Nuts! Nevertheless, dr l ron hubbard was right. When you are audited by me-- or those associated with me-- it IS just like the stimulus response present life personality-- which dr l ron hubbard et al so diligently polish and cherish-- does commit suicide; as You the Thetan, awareness of awareness unit takes over. Guilty!

Oh, well.....

THETAN ENSLAVEMENT

Thetan enslavement is herein applied, as a gradient, to any interference with the determinism of an awareness of awareness unit known as a Thetan. This understanding is helpful to those seeking untrappability, in order that he perceive and understand that which is to be avoided.

Thetan enslavement is the manic of the black or the white character, who is below having games for the fun of it, fully granting and receiving the granting of beingness of his peers, and who has abandoned aspiration to beauty. EXPECT these people to invalidate you, interfere with your determinism.

Those of a run-of-the-mine nature are relatively easy to handle. But, there are rarities who are not content with the small fry, nor to shoot the poor fish to be fried, in a barrel. They, in a sense are quite sporting about it, unless you happened to be one of the fish. The discussion below, pertains to the MASTER THETAN ENSLAVERS.

Their characteristics:

1. Attract the victims with something that is beautiful: then hide it; see to it that they never get it. Nothing is as beautiful as truth. This attracts Thetans of the highest order-- yeah-- BIG fish. The best way to hide something from a being of potentially high knowingness is to put it right in front of him, convince him that he does not own any part of it, that the Great Red Buddha, or Nirvana, or someone else owns it. Then convince him that it is not truth after all; brush it aside, and move on. He probably would not look there again, because, the Great One has already examined it and passed it by. The original data of Scientology is thus hidden.

2. Identify he who showed it to him with the thing itself. Induce the victim to put all of his trust, faith in that person, or symbol. This is the old thetan shell game. The truth is heard, understood, on the level of differentiation; it is associated with an identity; the Thetan then identifies with this identity. Ron was the "first one," as he called it at the Phila. Congress, Labor Day, 1953. As it is recorded in "Look-Don't Think," he said that if he had not discovered these things at this time, someone else shortly would do so. But, just because he got there first does not make him the Great Red Buddha. There IS other intelligence, perception on this earth other than his own-- even tho he steadfastly refuses to believe this. He has no more claim to the Science of Scientology than Ben Franklin had to electricity or Marconi had to radio. I have no connection with Scientology because I do not spiritually succumb to Huberg? That is about as much sense as it would be to say that I could not breathe the oxygen out of the air because Priestley-- or was it LaVoisier-- maybe DesCartes did not like me-- as they had, one of them, I think, discovered oxygen.

3. Apply hypnosis. Alas, alack and woe is us-- it is practically impossible to win in this force-physical environment, local to this time and space, without the use of hypnosis. This runs the gamut from the rote, ritual chants of the Catholic Church to the rock and roll chants of the Camel Cigarette. So, if one was to win, it would do so using the ground rules of the playing field in use. So, when I first had my nose shoved into the reality of PDHes, I was annoyed, but not overly shocked. But when I exposed this, Huberg attacked me for saying that there were such things, instead of calling me in for my proof. They called me a "Security Risk" said that I had to come

in to be brain washed. How did they know that I did not know something that they did not know? They didn't.

Then, in spite of the fact that I shouted as loud as I could, "You cannot even begin to find a PDH with an E-Meter, directly- sometimes you can find one by finding what does NOT react- dr l. ron hubbard comes out with this silly "cat" business in Issue #127 of Ability. I have found them by asking, "Find a time you were not PDHed." The commands, "This is not happening" "This is not real," "This is ridiculous," are so strong that the right time will produce a different reaction on the meter-- usually a drop.

When I have asked anybody I know who is not a Scientologist if they think that they might have been PDHed, they will reply that they have not the slightest idea, or some such remark. But just ask anybody who has taken a course, or who has gone to a Congress-- and you get it with the GREATEST CERTAINTY, "I could not have been PDHed. There was no time when it could have happened." Then, when I audit them, push the vacuum in for the appropriate terminal-- comes the anaten, then the elsewhere-ness, then the smuck, and the commands. If they are curious, we then run at least part of the incident(s), so they can see how, when, where it was done, and who did it. TO DATE, I AND MY ASSOCIATES HAVE FOUND AT LEAST ONE PDH ON EVERYBODY WHO HAS TAKEN AN SCN. COURSE, PRACTICALLY ALL OF THOSE WHO HAVE ATTENDED CONGRESSES.

The easy ones are those who had only one. They tell me about them, from direct recall. Found another one of these just lately. An attorney informs me that this is a Lingbergh Law violation, carries with it a possible death penalty.

Again, present life PDHes, just like present life engrams depend for their force on earlier ones. The whole chain is removed with Vacuum Cleaning Procedure.

THOSE WHO LOOK FOR PDHes, IMPLANTATIONS, FIND THEM. THOSE WHO DO NOT LOOK, DO NOT. THE REAL VICTIMS ARE THOSE WHO WILL NOT LOOK, BECAUSE SOME OTHER-DETERMINISM SAYS THEY ARE NOT THERE.

4. Remove all Theta-Determined goals. Insert other-determined goals into the vacuum. Get the victims to dedicate themselves to impossible goals.

Few Huborgians have any goals of their own, excepting Huborg goals for themselves-- such as "clear," "O.T." Using mechanical processes, they are not even heading in that direction. So-called "clears" were temporarily "made" using Dianetic processes, rashes of them have come, as per Huborg claim, from time to time, since. But, no stable permanent "clear" has been forthcoming, or will be forthcoming, as long as Huborg processing continues to consist of addressing the stimulus-response chains-- as evidence by the fast flicks, or instant reads, as they now call them. One operates as a Thetan as he becomes familiar with and IS himself as the awareness of awareness unit. This is accomplished as he becomes familiar with Thetan operation, and operates on his Theta-Determinism. To the degree that there are areas within his beingness over which he has no control, this will not be achieved. To the degree that a being is Huborg-operated, to that degree thetan-operation will be impossible.

5. Use the "Oh, pardon me" method. A few years ago, a preclear, has told me about asking a resident of Phoenix, formerly of Wichita Kan., Elizabeth N.J. just what his wife was doing to him. His reply was that if you wanted to really knock someone downscale, give them a kick, push, or hurt them in some other way, then say "oh pardon me," and really convince the victim that you are such a nice guy, mean only well toward him, are just trying to help him, would not hurt him for anything, etc. Then, after a while,

repeat this, complete with apologies, etc. Do this long enough, and the poor sucker will think that he is doing it to himself. Training courses, plowthem-in processes are good examples of this. We have Ron who gave us just about the only bases of truth on this planet, terrific insights, always right. Then we come to the 1st Clinical Course, say, with the absolute guarantee that we would end up "clear." Comes the finish of the course, "So sorry, pardon me-- we didn't make it." And everybody thought it was his own fault.

This has followed in every training course since. It is not necessary to plow people under, in order to train them. California demonstrated that a couple of years ago. Have not heard any of these good reports lately. It is now most apparent that that spin you took after an ACC or HCA was not an accident. They are planned that way.

The first "pardon me" was designed to make Thetan lookingness dangerous. Our noses were pushed into the most unconfrontable, unreal portions of the track. These electronics, etc., of course, could not really be run out by the techniques of that time-- if there was any therapy to be derived from running them in the first place-- so, they just hung there. "Pardon me, sorry."

So, to hop down the line; discussing only the hookers, not the nutritious bait. The 18th ACC was designed to apply force to auditing; that if any comm took place it would be in terms of solid, force, lines. "Tone 40." And dr 1 ron hubbard, almost four years later said that he did not know that the CCHes, etc. were being audited with force. I went thru two retreads and two ACCs, in which Tone 40, CCH was taught. Every instructor told us to use force and hypnotic glares-- and dr 1 ron hubbard instructed them to do so. Just another "Pardon me, so sorry." Black Scientology processing.

The 19th ACC was another, "unfortunate mistake-- pardon me. So sorry." Step 6 is another Black Scientology process. I pointed out in Issue #14 that it made the bank solid, that mocking up a loaf of bread and swinging it thru the solid bank would blow it. It did. I actually got benefit from it-- but not from the setting up of a mechanical mocking-up machine, which this process brought about. As is dr 1 ron hubbard did not know that this was what would happen! "Pardon me, so sorry."

Then the 20th; and the "rock" fiasco. This one really plowed them under, and got more "Pardon me, so sorry(s)." The facts are that the rock is easy to locate, has no charge on it, if you find the person who disapproved of it, and to date, the disapproval has been mutual. Recent discovery by E.R. Bates, while I was auditing him is what we call "the games thing." It consists of a stack of concentric rings tapering smaller at the center. Recently, I discovered the rock, located between the two smallest rings at the center. Copying it and blowing it takes the charge off.

I represent this handling of the rock as a typical example of the difference between the purposes and results of the activities of my colleagues and myself vs those of Huborg. Similar differences will be found in any sector you might care to look at. Yep, we are causing trouble and upset-- amidst the labyrinth of fixations in huborgian reactive minds. Most prominent of these: "dr 1 ron hubbard HAS to be right; Frank Sullivan HAS to be wrong." Oh, yeah?

Then, the 21st ACC was successful in accomplishing its purpose of convincing over 100 victims that engrams are too dangerous to be handled; further that they are all very incompetent auditors-- and dr 1 ron hubbard is very disappointed in them. Everyone was knocked downscale. Some of them have not fully recovered from it yet.

The format (process) is no longer used. We find that (bad effects produced by process) , has been used so often, it is worn thin. "Pardon me, so sorry." But, they knew that bad effects BEFORE it was widely used. Each one of these black scientology processes has been designed to debilitate the Thetan in a different manner. NOT ALL PROCESSES, BY ANY MEANS ARE "HOOKERS." THERE IS AN ABUNDANCE OF DELICIOUS BAIT-- but not so much, lately.

So--- each time we get hit over the head, or kicked in the shins, or....., we retire lick our wounds, decide that we must have committed some terrible crime against dr l ron hubbard, and these wonderful, beautiful, kind, perfect people. And if we do not feel this way, our not feeling this way is in itself an overt act, personally, against dr l ron hubbard. So, with the full conviction of our basic badness, we return to the fount of all know- ingness to be cleansed.. a flock more of "Pardon me, so sorry(s)," and we... well round and round again. And as our Theta-Determinism diminishes, we become more and more convinced that we are getting better-- because Huborg says we should be getting better and better.

6. Get the victims to identify with something, then about the time they feel that they own it, change and/or invalidate it. A dividend of above. Just when a process is well learned, change everything to a "better" way. One poor gal saved and skimped to go to Grim Hill. She was back only a couple of weeks, when an HCO Bull, came telling about how practically all that she had learned was passe. EACH TIME A BEING ACCEPTS A HUBORG INVALIDATION, AND DOES NOTHING ABOUT IT, A BIT OF THEIR OWN THETA-DETERMINISM VANISHES.

7. Get the victims to identify with cycles of action, then do not complete the cycles of action. Without full competence, this is bound to happen sometimes-- just, as in above, there are bound to be honest improvements in processes. Regardless, the effects are the same, when the victim is hung up in the identification band. I have not the room to list the hundreds of them. Big splash, then pffft- nothin'.... Hubbard College... Freudian Analysis certificates... Constitutional Administration Party... American Psychology... Civil Defense... on and on. Huborgians have attention still tied up here. If these goals are run out, it sure will be a good thing. Then there are the unkept promises-- "We will have an Akadema. You will submit your questions, and I will answer them." Everyone in the 19th submitted them. They lay on the lecture desk, then before our eyes, they were tossed by dr l ron hubbard, into the wastepaper basket.... and we sat there knowing still better and better, "THERE IS NO PART OF HUBORG SCIENTOLOGY THAT WE CAN CREATE AN EFFECT UPON---LET ALONE, OWN."

8. Encourage self-determined efforts on the part of the victims, then make it difficult for them to succeed. The field auditors have been told to "go forth" for years, but once they are forth, it has been let known to them they still are not a part of "Scientology. Huborg and only Huborg IS "Scien- tology." With the present tithing system, they have meager licenses to sur- vive. This has been done in small ways. For example there is the fable, "only HGC can produce clears." Field auditors have been slandered in correspond- ence-- or faint praised-- regularly.

I signed up for a franchise as soon as I could, after they were announ- ced. This was in the hope that at last there was something which would pro- duce good liaison between Huborg and the field. After a few months, HCO office received a complaint from one of my preclears-- on whom I had been foolish enough to use 21st ACC processes on. They have never received a complaint

wherein I have used my own processes, and probably never will. I, as usual, had this fully documented, sent the information to Smokey, and he sent back an O.K.

About six weeks later, I received a letter from the registrar, telling me that complaints had been received about my auditing; commanding me to come down to Washington, take a three weeks intensive at my expense, full rates-- otherwise they would immediately take action against me.

I replied immediately, that if there were any complaints against me, that if was from the source referred to above, that this had been cleared six weeks previously by the HCO office. I further stated that the registrar has no authority to write a field auditor, and even if the above were not true, their impertinence would still be ignored. I said that at the present time I was too busy co-auditing with another D. Son. I had just finished flattening "victims." The only victims I could find were victims of organizations-- and this was just what they were trying to make me-- with their present duress and coercion. I said further, that if I were to take auditing that huborg would be the last place I would go, as I heard too many bad reports from there, lately. I ended by saying for them to consider my franchise suspended, immediately. I was one of the first to take a franchise because I had been in hope that therein would come about co-ordination, teamwork between org and the field. With this attempt to victimize me, I now dispaired that this would happen.

I was, until then, a good source of income for huborg. So, there came a total of four letters from mary sue, including, "we just can't control our people..." huborg does not want a strong field. Their only purpose is CONTROL. Clear the world? With a total listing of 27 in continental United States? There are probably more psychiatrists than that listed in Elizabeth New Jersey. Never intended to. Phoney goal.

9. SET UP THE FICTION THAT THE GREAT ONE, HIS PROPHETS, ORGANIZATION IS PERFECT, SACRED; THAT ANYONE WHO COUNTERS THIS IS LOW TONED, UPSETTING DESTRUCTIVE AND NAUGHTY. No truly righteous man or group has to blatantly blat his own merits and perfection. But this is practiced by every slavemaster that ever existed. The slavery comes about when it is believed; and the enslaved feels that he cannot have any thought about the enslaving object, excepting those which concur with what the enslaving object says about itself. If you are not as willing to think an unkind thought, or any other kind of a thought about huborg, as to think a kind one-- to the degree that you cannot, your Theta-Determinism has been tampered; to that degree you have been enslaved. Evaluate by actions, not by what is claimed or said.... And I entreat you to adjudge me in such a manner, too. But do not expect that dr 1 ron bubhard, "ought to be" (Dec. 1961 Congress). "clear" like what Huborg says he is!!! Thou shalt verily perish if thou dost.

10. WHILE PRETENDING TO ADDRESS THAT WHICH IS SPIRITUAL, PRESENT IT IN SUCH A MANNER THAT ALL WILL BE CONVINCED THAT IT IS SOMETHING TOO TERRIBLE TO LOOK AT. Remember the horrors of the content of "History of Man" incidents, etc? These early presentations are utterly consistent with the over all pattern of presenting that which is beautiful, then interspersing it with "hookers." These things could not have possibly been reduced by the processes of that time.

With these, others that followed, and, let us say, coincidentally, the content of PDH commands, it really did seem quite plausible to cease to address, improve the abilities of the Awareness of Awareness Unit-- and to "head south." It was said by huborg that these processes made the preclear

more "queezey" to the extent that they addressed the Thetan. Ron's Thetan doingness processes were effective, including Creative Processing were effective. To the extent that Huborg processes include Thetan doingness, they are effective.

But, to really win on this, it is advisable to take it gradiently. Look at the immediate past body time and those immediately before it which most influence this body time. Then look at the immediate past games; and as each piece of data, each scene is forthcoming, immediately handle it thru vacuum cleaning. But, by all means, mook everything up in present time and space.

The only Thetan goal in running past track is to gain UNDERSTANDING of past purposes and goals, they might be evaluated; a decision made relative to optimum action or no action in present time. Huborg's purpose is to convince the victims that the past is all bad. We have Theta-Determined purposes and goals which transcend many lifetimes. It is that we either proceed to complete these cycles of action, or thru the force of goals processing, etc. abnegate our own determinism, and "say" that there are only those goals which are in present time. Ron defined a neurotic as a person stuck in present time. Watch it kid-- lest you get yourself sucked into becoming a neurotic Thetan.

The subject matter which will enable us to gain this understanding of the true nature of ourselves which evidence on the meter in heavy drops, and in rises of the needle-- never as fast flicks, or instant reads. I was aware of the fast flick phenomena long before dr 1 ron hubbard mentioned it--found it very heavily when the precise wording of a PDH came up, if the preclear was in THAT moment of time.

11. APPLY MORE AND MORE MECHANICS UNDER THE GUISE OF SPIRITUALITY. Each truth that has been presented to mankind has then been considered to be so wonderful that the keepers of it try to "give" it to all mankind. Of course, all but a portion of one percent of mankind can understand spirituality only in terms of the physical, with some small gradation in between. So, if the saviors are to save or the clergymen are to cler, and the huborgs are to clear, you gotta have something solid to pin it too-- like with diapers. Otherwise-- well, never mind.

All about you are examples of the endeavors to explain-- and far too often, to subvert-- that which is spiritual in terms of that which is physical. The Rosicrucians mental-spiritual gymnastics are an example. The huborgy running figure-figure processes is another. The churches, mosques, and the organizations, creeds, etc., becoming more important than the basic truths behind them. They all substitute the "mores of the race" and the dictates of the sect for Thetan ethics... "You have done all of these bad things, so you cannot trust yourself. You gotta use these rules."

But, there are some dangerous renegades of the genus esquirel, who allegedly cause trouble and upset, who practice what Ron preaches. They take the definition of "Scientology is the science of knowing how to know," just as if maybe it might be true. Knowingness requires no stable datum. Like, "This is true, because dr 1 ron hubbard says so." To the huborgies, he IS the stable datum, and things are true or untrue, dependent upon their alignment with him. This creates dependency upon him, and he says--stable datum (will resist pun), "Depend on the mechanics of the process and you will reach O.T." Thetans if you depend on ANYTHING, you will reach no further than that dependency. You will be stuck right there.

In vacuum cleaning procedure, you create no dependency on the process. It leads to your be able to let go of this crud directly by your own decision without the process as a via.

Erratum: Last lines pp. 7. It leads to your beING able.....

So, OK. Ron gave us a wonderful science which can raise us up out of statuary quo. Then a bunch of bozos started taking partial data and going off on tangents, making like skyrockets. From these came the word "squirrel." So Ron had to set up boundaries, and we have Hubbardism. If he were to succeed in the physical universe game, something solid and financial was necessary, and we have Hubbard & Co. In order to create a maximal effect on this plaintive planet you gotta suck them in, in statistical quantity-- so he came about with Hubbard's Witnesses. What does this prove? Well, it indicates one thing very strongly, and that is that he is damned alive, and one hell of a good games player. In spite of all of my woof-woof and arf-arf, I think he is a great guy. I sure would hate to think of how doggone uninteresting everything would be if he did not show up. I thank everything that BE that he IS.

But, there are a couple of unimportant, measly considerations which kind of sort of tend to get in the way. The first: I do not elect to be his victim. The second: I intend to do everything that I can to see to it that my buddies do not become his victims. This will not bother him too much statistically. Let him have his harvest of souls.

You see, my buddies and I are old settlers around these parts. We have had lots of good games on these playing fields. We like it here. We intend to have lots more good games here... and this includes the next one about to start. Hubbard has told us not to look for him on our time tracks-- that he is not there. It seems so. Yep, he is an interloper from way out thar; an advance agent for Golden Gimmicks, Inc., I think they call it, making suckers out of the local yokels, meaning us. Oh well, but if we got it coming, if he doesn't someone else will.

But-- know what, brethren? We're gonna make it!

Erratum: Doggone it, used capital letters for hubbard. Doggone me. I let him off too easy!
