

THE SECOND TERMINAL

Numero 44

Franklin S. Sullivan, D. Scn.
Entrepreneur

MR. SULLIVAN GOES TO WASHINGTON-----

Yeah, this is being written within walking distance of the Academy....
I mean Church. I am auditing here.

I have been over to the church several times. I like the feel of the place better than I have at any time since 1958, just before Dick Steves left. Of course, I could have pervaded it at any time from any location, and learned what I did, but I guess I still have some MEST agreements that it is realer if I validate it in person. Besides, I wanted to find out if I still had any body resistance to Huborg.

Actually, I felt quite comfortable sitting on the front stoop, talking to old friends, meeting new ones. I enjoyed the sincerity and intensity of purpose that these people, and endeavored to grant them beingness as what they say that they are. I felt that there was quite a bit of two way flow on this. I felt that my previous Thetan pervasion-- as expressed in the last issue-- was validated. One can gradiently BE, despite obstacles. I said that wrong. One can gradiently BE, BECAUSE of obstacles-- a la "Monkey" referred to in Issue 43.

As far as I observe, the students seem to be coming upscale on course. But, they seem to be EARNING it. This is, and maybe always will a function their aspiration, state of case, and basic Thetan capabilities-- so, is bound to be variant. One old track buddy seems to be getting out of the course something or other that I was not able to encompass, and I am delighted. Was a bit disappointed, tho, when he intimated that he thought he might be "betraying" me by taking the course in the first place. What the hell do I care HOW he wins! I don't claim to be perfect. I do claim that I have a lot higher batting average than Huborg ~~has~~ tho. Then, there is an irascible rascal, a capricious, elongated pixie, who has been, even more intimately an old track buddy of mine-- and insists so violently on being herself that it sometimes even irritates the heckkout of me(tho I really like it). She is overtly critical of anything she does not like in the course. The very fact that they stand for her, gives Huborg a great big plus mark in my books. She also makes the course itself into a real interesting game, and aspires to get thru it in record time. Imagine it! She has the audacity to be co-cause!

OK, so I am saying nice things. Maybe I will change my mind next week.

Also, this does not mean that I have any more desire to participate in Huborg activity. I have never gone to church, excepting under duress.(Again: excepting Unitarian). I see in Huborg that element of Churchianity which repelled me even when I was a kid. I have never felt that there was ANY "god" masterminter intercessor between myself and the Supreme Creator. Even in my darker days, I maintained the right to determine for myself-- tho I did little determining, then. I made case gain to the extent that I was free of Huborg influence. I realize that with others, they have a good, but limited purpose; seek not to battle, obstruct them, but to understand them. I, mainly, seek augmented interation of communication with others who are willing to BE, determining for themselves. This is fun. I also seek to implement these comm lines on all brackets. Thusly we will move toward the goals Ron TALKS about.

SESSION? WHATSA SESSION?

Definition: A session is that which transpires when a preclear owns the space of an auditing room, and is happy and willing to have the auditor occupy, share the same space.

Definition: Rudiments are that which are IN when an auditor owns the space of an auditing room, and is happy and willing to have the preclear occupy, share the same space.

It is entirely possible for the rudiments to be in, but if the preclear is not owning his space— he simply is not there. The bank is there, all right, and the bank reacts, and reacts and reacts to the auditor's commands. This is a necessary, temporary contingency, and is expedient prior to the time that the preclear is able to create his own space. This is useful to the extent it does allow the preclear to eventually get thru enough bank, and finally be able to create his own space.

Mechanical Rudiments: A duress applied, via Huborg rote, to capture and impinge the attention of the body personality, somatic strip bank— without the creation of space, without the auditor as a Thetan or the preclear as a Thetan being present.

To the extent that the auditor depends upon the rudiments to get a preclear into "session" the responsibility for the session is assumed by the rote of the process being used, and by the electrometer as read by the auditor... That is, usually. It does not have to be this way. But, it is probably otherwise quite rare, as an auditor sharing the space with the preclear certainly would not waste the time, invalidate the preclear as a Thetan by running mechanical rudiments.

Definition: Pulling withholds— What occurs as normal auditing when there is a session, and the rudiments are in. (Thanks F.C.)

Definition: Mechanically pulling withholds— A means of further collapsing the preclear's space by "proving" to him that the meter knows all— he knows nothing and, brother, he sure had better come clean. The withholds so pulled are contained in the somatic strip— and this action serves to further "prove" to him that he IS the somatic strip.

In truth, everything in the bank which is not known, consciously, could be called a withhold. Calling this peculiar, instant read, somatic strip, only, withholding, is but taking a small portion of the truth and calling it the whole truth.

Again, as Ron has told us, the ability to withhold is really the essence of the ability to communicate. Those who cannot, throw out a wall of words. Addressing the subject but introverts the preclear into it, to some degree creates an anxiety type of reality upon it, as a problem wherein, usually, none existed before auditing.

Mechanical, or Control Auditing is useful and appropriate wherein the Thetan is unwilling to take responsibility for the bank. In it, the auditor, alone, owns the space of the auditing room, and the preclear is a something that is at his command. This is, of course, gradient. The gradient is largely dependent upon that which the auditor is willing to grant the preclear to BE. It is possible to get a true session using mechanical rigamarole— but this is most difficult.

Definition: ARC break. The Thetans manifestation of resentment to inappropriate mechanical control auditing. A preclear who knows that the auditor is granting him beingness as and how!! A preclear in session, as above, simply does not ARC break. Further, when this preclear is in session, the auditor can invalidate hell out of the preclear's bank, with no manifestation of resentment from the preclear.

I believe in auditing in utter simplicity— and I practice what I preach. Sure, the ability to use methodology is a good thing to know, and even to use, the few times that it is appropriate. But, I have seen too many auditors ruined by the foul doctrine that it is the process, not the auditor/preclear together that gets wins. Many of them who were willing to know/look before training come back debilitated, with a feeling that to use their native abilities would be being unfaithful to Ron or something. Nuts!

....But, now, I am told that the training emphasis is on naturalness. They flunk you if you audit mechanically. Good. That takes some wind out of my sails. Worse than that, they even create space, I am told, TR4. If they keep this up, it will simply ruin 2nd Terminal circulation... and it looks mighty bad-----

In fact, there seems to be enatching a foul, dastardly plot to completely wreck the 2nd Terminal. Know what they are doing at the Sacred Hill? They are running implants! Woe is me! But, all is not lost, they are just peeking under the corner of the lid. Something about between lives stations commands tangling up reactive goals. Yeah. This is like I been saying. Implants are applied to the somatic strip— and the somatic strip is the sum total of that which is being addressed by present Huborg processing.

But, horrors and nightmares of nightmares— what if they should keep right on looking and see that our resistance, not-issness to other-determinism, as counter-effort, etc. really does make up a vast area of bank content which aberrates us. What if they should start addressing the phwole bank— instead of poking holes in it like they have be since 1950.

I just simply could not confront this! What would I have to rant and rave about. Owwwww! They may even find a way— their own of course— to totally remove bank solids directly, instead of pushing them around, packing them tighter. If they do— and YIPE!!! they even might start finding PDHes. If they do, I am a dead duck. I might as well fold up my tent and start looking around for another valence. I wonder what one would be interesting-----

BANK? WHATSA BANK?

So, what do I mean in above crack; about addressing the entire bank?

In 1950 Dianetics, when a preclear was found interiorized in a present lifetime engram; the preclear was occupying the same space as the incident, and was attuned to the "wavelength" of that incident. This incident was there, possessed an undue force solely because it was a this bodytime key-in, of a long or short past bodytime— no bodytime chain. THERE HAS NEVER BEEN FOUND A THIS BODYTIME ENGRAM, OF ANY MAGNITUDE, WHICH UPON INVESTIGATION WAS NOT MERELY A THIS LIFE KEY-IN OF A CHAIN. This is evidenced by the fact that people do not react to the same engramic incident or condtion within a range which could be explained in terms of present bodytime expeience.

As the truth pertaining to the key-in was understood, the chain itself moved out into the "vastness" of the bank. In doing so, it left behind a space at its wavelength. As long as the preclear could keep his awareness in this space, and keep it free, uncollapsed, he experienced the phenomena known as "clear." Free space and free Theta are from any present viewpoint practically synonymous. It is also, opening up an area of "Games Universe." It is in such an area that we can place our creations, and control them. They are there solely because we SAY they are there, not because they tell us they are there. To the degree that our space is cluttered, our mockups tend to be thin, etc.

Counter to this, a Thetan has theoretically the ability to create space, destroy it, whenever he chooses. But, to the degree that he is aberrated, this ability is diminished. This ability is regained as he becomes familiar with, confronts, handles bank solids. This is accomplished thru the use of Vacuum Cleaning Procedure, —as a dividend to its main purpose— and other creative type of processes. Step VI is a burlesque of this; tends to put the making of mockups on automatic, just makes the bank solid.

Huborg processing, since 1953, has largely followed the pattern of taking a portion of the bank, calling it the whole bank, poking a hole in it by pushing it aside and/or compressing it. As this is done, an area is "cleared" and by certain set up tests, the preclear can be called clear— and he is, as long as his attention remains in this area.

Progress has been made to the extent that larger and larger holes have been poked. Goals processing seems to be the best of these. Herein, bank content is rolled up, like you would roll up spaghetti on a fork, but is then just moved out of the area of immediate awareness, left there. The clearing is as temporary as before, but, by this time, the guy is supposed to be working on his next goal... and this could last forever.

SUBJECT, OR BUTTON PROCESSING

This refers to the process which says something about something, alter-isses it thru categorization— thereby cleaning up odds and ends in the bank, putting them in a chain. Oh, for example, take "Help," "Failed Help." The preclear takes an act, arbitrarily categorizes it as one or the other. This act may have a half dozen or more elements which could be more or less of the "maybe" character— at some point between Help or Failed Help— but when the alter-issness is applied, and it is SAID that it is Help or Failed Help, this gets stuck solidly on the Help or Failed Help chain.

This serves to make the bank less fuzzy. Every little thing does not bother the preclear. But this has the liability that afterwares too much of what the preclear does has to be filtered thru the considerations, etc. he socked in to solidly while he was building up this "help-Failed Help" chain in the bank. He becomes sensitive to the subject.

Just look for yourself. Those who have their witholds pulled, are sensitive to the subject of witholds— excepting wherein they lock their attention in the recently vacated area of some GPM etc.

And how do I have the audacity to say these things? Because I look at banks Thetawise, see what is there. YOU CAN TOO. How? Get yourself audited using Vacuum Cleaning Procedure— and SEE for yourself what happens to the bank when processing is done. See the smuck, crap and garbage which aberrates you dissolve and disappear PERMANENTLY. You can then see in o'hers, how Huborg processes do nothing except push it from here to there— and after while it is likely to come right back.

(See, in Farrington)

THE ABOLITION OF SCIENTOLOGY

I wish to again outline my viewpoint regarding Huborg Scientology.

I intend to be receptive to all that is new in Huborg; to receive all that is new, duplicate it-- then evaluate it. If I in any way alter-iss or not-iss anything that is said, I will thereby be defeating my basic purpose. Because I do maintain a sympathetic attitude, when receiving this data, I tend to create the impression on those who are enclosed in Huborg identification, that I am ready to have my soul saved, or something. I am writing... this because, it may seem to these friends of mine, that a later reversal of attitude is a betrayal. It is not.

The Second Terminal is written for the interest of those who recognize the verity of Ron's basic truths-- and who purpose to make them their own employing their own Theta-Determined critical evaluation. In a true science, it matters not WED says it: it is but one's own evaluation of the verity and value of what is said which pertains.

Dr. L. Ron Hubbard is now rapidly converting the science of Scientology into a religion. This has taken a bit of doing, as he is now overtly installing WITHIN Scientology the compulsive elements which most Scientologists entered Scientology to avoid. This is not really new; it has required years of "conditioning"-- as with Pavlov's dog. The main progress which has been accomplished in the past 18 years lies in the quantity of people, and their increased supineness with which they take ANYTHING that Dr. L. Ron Hubbard says-- totally innocent of any evaluation on their part.

Religions have followed the same pattern:

1. Beautiful truths
2. A Great leader who "owns" the beautiful truths.
3. Distortion of the beautiful truths to make them "practical" that the masses can understand them.
4. Greater and greater sanctification of the Great Leader, leading toward a total thought control, "I will tell you what to think."

And the victims end up encased in that which they originally Theta-Determinedly sought to rise above. In Churchianity, there is only The Great One. Everyone else is a victim. Complete identification with a "good" thing is just as debilitating as complete identification with a "bad" one. The only difference I can see, is that complete identification with a bad one is usually a lot more interesting.

Scientology and scientology

Ron has given us the truths of an unlimited science.

Dr. L. Ron Hubbard has placed a fence around this unlimited science by copyrighting it-- saying that it is only that which he originates. It is both immoral and unethical to reveal truth to others (charging them high fees to learn it) and tell them that they cannot evaluate it, contribute to it, own it, excepting as an appendage to his first dynamic. He called this Scientology.

Hereinafter, the word Scientology will refer to that which Dr. L. Ron Hubbard says that it is. The word scientology will refer to the free science... that you and I can OWN.

Why do I talk like this when I was talking so nice like the first couple of pages? Because, altho things are mainly better, there is no assurance that they will continue this trend. Some of you can remember that I talked that way, said nice things about Huborg in 1957-8, just before Steves left-- then Boon, down came the boom. I regard them for what they are-- not the inconsistent words telling us what they say they are.

I want Ron to win, but more importantly, I want all of us to win-- in terms of free Theta-Determinism. We will do this, to the degree that we are free of the other-determinism of our own banks, of Huborg, Sullivan or anything else. **THIS FREEDOM MUST BE EARNED. EVALUATE FOR YOURSELF.**

I am grateful to Ron. Gratitude such as, "You have shown me the truth, you have 'saved me soul,' so I will forever be your slave," is at a mighty low level. I endeavor to practice what Ron preached, and do so in terms of my own Theta-Determinism-- like he said.

I promise to look at Huborg Scientology in present time, to regard each issuance, action in terms of that issuance, action. I hope that they will prove me wrong in all of the "bad" things I have said about them. I hope that some day there will be no differentiation between Scientology and scientology-- and to be really back among my friends.

IMPLANTATION

For a couple of years, now, I have been telling you that that which most aberrates the Thetan is the interference with his Theta-Determination.

To a portion of you this was "squirrel stuff" totally untrue-- because Dr. L. Ron Hubbard did not say this.

On May 11, 1963, an HCO Bulletin was issued to the effect that the basic on the heaviest GPM was an implant on heaven, another a trillion or so years later. Without running this out, the GPM apparently does not reduce. So, what do you know--they are running implants-- pardon me--an implant.

Ever since Issue 29A, I have been telling you that the fast flick, or as later called, instant roads were an implant manifestation. In this case, it was PDHes.

Checked this heaven implant. Had the preclear mock up "heaven" as described in the HCO Bulletin. Had him copy the mockup, unmock the copy, push the space, or vacuum of the mockup thru the original, as in Std. Vac. Clean. Proc. It ran O.K., seemed to be valid. It sure was not the heaviest thing we in this research, have ever run.

You see, if it should really be the basic on the chain, it was the first incident wherein we vacated the space. I do not feel that there is a force anywhere which could cause a Thetan to vacate space in his games universe against his will. So-- we know from experience-- that if he REALLY AGREED to it, it would not reduce... unless the preclear fully as-ised the basic agreement.

Axiom 37. "When a primary consideration is altered but still exists, persistence is achieved for the altering consideration." Our observation indicates this axiom as the definition of aberration. That which is aberrative is never the primary consideration, the basic incident. It is the persistent alterations of the prima consideration which aberrate.

Definition: **ABERRATION IS AN ALTERATION OF A PRIMARY POSTULATE OR CONSIDERATION.**

Definition: **IMPLANTATION IS AN ALTERATION OF A PRIMARY POSTULATE OR CONSIDERATION.**

This is more easily understood with the comprehension that creation is postulate as primary thought-- not the manifestation of same. For example, true art exists within the artist. The painting is but a fossilization of same.

BASIC IMPLANTS

Several years ago, I discovered that if the identity of the person who disapproved of one's rock-- and whose rock(s) one disapproved of, the incident had no charge on it. This was referred to, again in Issue #42, mainly in #30.

Later, I found an alter-iveness to my rock (which is a perfect cube). A silver blade was put into it at an angle, on the top side, and the cube was blackened. I had recovered this in an incident 11,978,876.--- (and rest I don't now recall) years ago. I got it that it was put on me as a curse. I recovered the person who put this curse on me.

A few months later, in May 1961, I audited the person who was supposed to have put this curse on me. She had entered Scientology with a purpose of getting rid an energy mass to the left of her head. We had completed the intensive, but the mass was still there. I decided to KNOW what the answer was. Just coming afterwards, I asked her to mockup the black cube with the silver blade stuck into the top of it... unmock it, push the space thru

the energy mass to the left of her head. Out came black smuck. We repeated it .. and many more times.. The mass blew. To my best knowledge, it has not recurred... Thereupon was born Vacuum Cleaning Procedure.

Actually, as per Issue #42, the original alter-ness occurred at the time of the Rock Incident. And, it is this altered creation which had the charge-- for all concerned. I have also run the counter-creating of other's Rock. It is mighty heavy. The charge that might appear to be on the original incident, is probably but some induced key-in of the alter-ness.

TANGLED CHAINS

The above receipt is given as an example, because only in primary situations such as this do we find anything like a simplicity. I have, of course, run others similar to it.

The bank is the epitome of disorder and complexity. Each one is different. It is some conglomeration of black or grey or colored or white masses, wires, spaghetti, rope, lint, symbols, simple forms to complex forms, simple machines to complex machines, solids, liquids, gases, fungus, sparkly things, old bodies-- or parts of same, you name it and we have probably found it. It is located in space coincident with the physical body, and in space around the body-- out, oh, maybe a half a mile or more. The stuff way out thar does not usually bother us, just fences us in.

It seems to be operated from the inside out. The parts that effect us are those which occupy space coincident to the space wherein we consider ourselves to be.

Parts are from virulently active to practically dormant-- the active portions are generally those closest in. Portions move, out automatically, as so well described by Ron in Dianetics. If the Thetan owns no free space something or other will generally be keyed in at all times. Clarity exists when space is free and the bank does not key in automatically.

Stuff seems to align itself by a sort of associative affinity. This alignment we call "chains." Sometimes they do take a stringy form. But others might be in most any shape, such as a ball, cylinder; still others might collect in a formless mass.

SIGNIFICANCES ARE THAT WHICH GIVE THE CHAIN/MASSES COHESION. Without these significances, the masses would dissolve. When they are perceived, handled without significances-- as in Vacuum Cleaning Procedure, they do dissolve, flow, and are mechanically destroyed.

The subject matter significance is random in accordance to the preclears considerations, opinions. There might be a chain for Ma, say. Then, when suppressed, be careful of, or witholds, or help, is run, new considerations/opinions are added to the chain, and a be careful of, withhold chain tends to be formed, or, if not, these significances add cohesion, or goo to the bank. Anything which is considered/opined ABOUT any subject matter in the bank adds mass/cohesion to the bank.

Axiom 36. "A lie is a second postulate, statement or condition designed to mask a primary postulate which is permitted to remain."... And the third postulate masks the second.. the fourth, the third.... the ninety-seventh, the ninety-sixth.... excepting that they have long since ceased to be postulates, have become considerations, then opinions. Thusly, in Vacuum Cleaning Procedure, the crud comes off inversely, in layers.... that is, sometimes. More often, it comes off in layers, but all of the heavy solids, then smoky guck-- I call smuck-- perhaps liquids-- usually wisemotions-- transparencies and gas. But, no two preclears run the same. No two terminals run the same.

No two banks are the same. This is true because of the extreme randomness of experience. Artificial-- religious-- considerations, opinions such as karma, or its many variations including term./opp. term. as in Scientology, can be imposed on the bank. But, these constitute just another alter-issness adds cohesion to the bank, **TANGLES EXISTENT CHAINS.**

Because of past alter-issnesses, etc. most long chains have considerable cohesiveness with analogous chains, incident to the person's applied considerations, opinions. The charge in running out lock chains-- as with the rock-- is contributed to mainly by the keying in of other chains. Conversely, the finding of an early, or the basic incident on such a chain would not run out the entire chain, as it is tangled with a lot of other crud.

Any focus of attention, whether analytical, as cause, or reactive, as effect, will pr can pull in a segment or piece of bank-- or at least, activate it. As-issing it can destroy it. Saying something about it, as in Euborg processing, can realign it, cause it to move away, become pro ten inactive.

So it is with Dr. LRHs "heaven" implants. Saying things ABOUT it will key it out, will have little or no effect on the thousands to millions of later implant per se. There is some likelihood that this alter-issing will sensitize these other religious implants-- making the being more subject to present day ones..... This is in line with the fact that people were more sensitive to the Rock Chain after the alter-issness of the "help" chain was impinged upon it. Saying something about it is but adding signigance, mass.

WHAT RIGHT DO I HAVE TO SAY THESE THINGS?

Everything written herein is based upon direct observation. Everyone who has been run on Vacuum Cleaning Procedure has observed at least some portion of it. If you were to be run on Vacuum Cleaning Procedure, you could percieve it also. I have been auditing implants for the past ten years. Pardon me-- I have been running out OVERT implants... Any engram serves as an implantation.

As you read this, do you get any sort of a feeling that what I say could not possibly be true-- because Dr. L. Ron Hubbard did not say it? "Does Dr. J.Doe (or Dr. LRH) agree with your proposition? No? Then, of course, it cannot be true. Dr. Doe (LRH) is an eminent authority in the field."() mine. Ability 147-- pp. XIII.

In 5/11/63 bulletin LRH speaks as if it would be a terrible thing to be guilty of setting in this "heaven" implant. Hypocrisy! He has laid implenty of them. So have you. So have I. Let us not resist them. Let us understand them!

..And I mean ALL of them-- raus mit em. They are not good. They are not bad. At the present moment as we are clearing the decks for a new game, they are inappropriate.

I have a right to say what I say because I am an authority on the subject and I know what I am talking about.

THE ANSWER

Tersely, the best answer is to remove the greatest possible quantity of keyed-in bank as rapidly as possible.

Now then, you could sort out the garbage, separate the tomatoc peelings from the coffee grounds, put nice labels on them that say "Goals" "Opp. terms" etc., then cache them away in a closet using Euborg processes-- or get rid of them using Vacuum Cleaning Procedure. But, it would probably take 50-100 hours or more preparing it, and an hour, or less to run the Vacuum Cleaning Procedure. But if you should have your Goals, GPM or what have you, and want to do it this way, have the preclear mock up a mass and postulate that it contains the GPM, etc. He may be able to, "Run a line from this mass to somewhere in your body or bank. Let the line go where it will." He may be able to locate it, see it. Then have him copy it unmock the copy push it thru the

original, etc. See issue #35. If he cannot, just have him push the vacuum for the black mass thru his body. If he cannot conceive of a vacuum, have him keep knocking up the solid mass and push it thru.

If you are sufficiently free to act on your own determinism, find some one and try running Vacuum Cleaning Procedure, yourself. If you have no issue #35, let me know, and I will send you one.

If have some feeling that perhaps I am not a lunatic or a faker, would like some sort of subjective reality on Vacuum Cleaning Procedure, let me know. I will either have a local auditor get in touch with you, or see you the next time I am around that way. There will be no charge for a 3-5 hour run. Your only cost would be the auditor's out-of-pocket, if a local one is not available. The proof of the pudding-----

SCENES FROM A STAGE... BY FRED CONNELL

Being an actor of sorts, it was recommended that I should be on stage. More specifically, the implication was that I was a bad actor and should take the next one. I was given twenty five hours (intensive) to get out of the town of Confusion Mass.

Travelling toward Light(er stuff), many views were obtained which lead toward the following theory--from the viewpoint of one preclear.

There are pictures, and there are chains of pictures of events that have similarity, or similarity of "Significance." When these are subjected to the squeeze of a dichotomy (can't; but must- or something similar), they tend to merge together into a heavy black mass, or gunk. (grey for less pressure, etc)

When these masses are subjected to the squeeze of further dichotomies (must be; but not be, etc) they tend to get more dense and become glassy. Like having a mess of sand in front of you- can't see thru it, but if you heat and pressurize; Presto! A window. Aha, you can see again, and even pretend that the window protects you from weather, wind, or something or other.

When glassy stuff is subjected to the further pressure of other chains of already pressurized stuff- when the glass becomes dirty and an obstacle; then something occurs that appears similar to molecular collapse. The result is tremendous distances between super dense minute particles. Much easier to see thru, and you can then say- see, there is "nothing" here. It is (I am) clear.

Experiment showed that one super dense particle yielded several cubic yards of glassy stuff; That one particle of glassy stuff (resistance to change) yielded several cubic yards of black crud; and that one particle of black crud yielded one full blown, life size picture.

So, if you should get on the stage give thought to the fact that as you look thru the almost unnoticed glass, at the scene, there may be "nothing" between you and the glass.

It seems that ~~EVERYTHING~~ we have ever resisted is still there. Now, we know how to get rid of it ALL, that we may again own the space of our Games Universe. Goals? Every reactive goal we have is implanted upon the somatic strip. They, too, fall, flow away incidently, with ease as long as they are not validated by the alter-ness of significances--but they still constitute just a small portion of the total--all of which aberrates us.

Clear? Hubbard never really told us, excepting in grandiose fuzzy terms. Kipling has done a bang-up job of this. See over.

If--

If you can keep your head when all about you
 Are losing theirs and blaming it on you,
 If you can trust yourself when all men doubt you,
 But make allowance for their doubting too;
 If you can wait and not be tired by waiting,
 Or being lied about, don't deal in lies,
 Or being hated, don't give way to hating,
 And yet, don't look too good, nor talk too wise,

If you can dream- and not make dreams your master;
 If you can think- and not make thoughts your aim;
 If you can meet with Triumph and Disaster
 And treat these two impostors just the same;
 If you can bear to hear the truth you've spoken
 Twisted by knaves to make a trap for fools,
 Or watch the thing you gave your life to, broken,
 And stoop and build 'em up with worn-out tools.

If you can make one heap of all your winnings
 And risk it in one turn of pitch-and-toss,
 And lose, and start again at your beginnings
 And never breathe a word about your loss;
 If you can force your heart and nerve and sinew
 To serve you long after they are gone,
 And so hold when there is nothing in you
 Except the Will which says to them: "Hold on!"

If you can talk with crowds and keep your virtue,
 Or walk with Kings- nor lose your common touch,
 If neither foes nor loving friends can hurt you,
 If all men count with you, but none too much:
 If you can fill the unforgiving minute
 With sixty seconds worth of distance run,
 Yours is the earth and everything that's in it,
 And- which is more- you'll be a Man, my son!

*CLEAR!
