THETA-DETERMINISM

Some time ago, I mentioned that when I receive new data-- like from Hubbard-- I agree/disagree with it at least several times before I come to a conclusion. Recently, I resumed looking at this. I believe that I have re-found some higher levels of truth on this subject. I feel that this is Standard Operating Procedure re: any of the more effective levels of Thetan operation. I do not represent that I have accomplished applying these contents. My purpose is to strive to do so.

SUMMARY. Explanations on each will be found below.

1. A stimulus imposes itself upon the body, body personality as counter thought, effort or emotion.
2. Its imposition is resisted reactively. This brings about, if minor, a facsimile, or other energy deposit.
3. This facsimile is owned, creatively duplicated within the space of our games universe. (The area in which we operate Theta-determinedly.)
4. The duplicate is admired, reduced to zero. (As per Ron, 1952.)
5. It is again mocked up within the space of our Games Universe. (8-8008)
6. It, its various facets, contingencies are then agreed with/disagreed with. Analogous past experience is Theta-Determinedly sought for in the bank. Evaluation of present data is made in light of similarities, differences, as compared with past data. Thereby, understanding, determination is reached.
7. Course of action/no action is determined, mocked up. The appropriate is decided upon-- to effect the desired action-- then is imposed upon the body/body personality.
8. The command to act, as no-force Theta effort, is given by the Thetar
9. The action takes place, using the created action mockup as a pattern
10. An effect upon solids-as-effect is thereby Theta-determinedly created. (Axiom 10)

My surprised congratulations to you if the above is at all self-evident. Congratulations also if there is no "too complicated" or "too much work" reaction. It is not complicated. It is not work. The speed and ease with which we act on the Theta-Determinism-no force-no effort band is almost incomprehensible when regarded from the body/body personality level. I KNOW that this is what occurs when I sat down to the piano-- and, now the organ-- with just a pure emotion-- of anything from joy to anguish-- or a past pleasure moment, and pour out a melody I have never heard before in this bodytime. Further, it is played with a skill which I cannot begin to approach in ordinary playing from sheet music.

Please understand that the "Thetan mechanics" are extremely simple. The above is in reference to "Thetan-in-body." The free Theta-as-a-viewpoint can look, know, act in extreme simplicity, at the Creative level. Its physical imitation is in direct stimulus-response, in the physical universe-- like when you put your hand on a hot stove. The full inversion of Theta-Determined

action are in the reactive cycle figure-figure, misemotion, symbols, eatingness, sex, mystery, unknowingness. These will be discussed in detail.

1., above, is in accord with Ron's Dianetic axiom that any thought (effort, emotion) is preceded by a counter effort (thought, emotion).

Please understand that the execution of a Theta-Determined cycle of action precludes the ability to differentiate between that which is of the other determinism of one's reactive bank; that which is of the valence of this bodytime personality; and one's own Thetan Beingness, as a singularity of viewpoint of Theta. I FEEL THAT THE MAJOR PURPOSE OF PROCESSING LIES IN THE FAMILIARIZATION OF THIS DIFFERENTIATION. ANY PROCESS WHICH LUMPS "YOU" AS A CONGLOMERATE IDENTIFICATION DEPRECIATES THETA-DETERMINISM BY FUSING IT WITH THE THIS BODYTIME VALENCE. The contingent talk about increasing self-determinism merely makes this fusion more plausible. When this fusion is complete, what is called "operating Thetan"-- but what is really operating valence-- processing can begin. Every Theta-Determined goal is moved out-- and the only goal-- that which the Huborgian is BEING which is Dr. L. Ron Hubbard's valence, remains. It is this valence which "operates." Have you ever seen a "good" Huborgian who can do very much excepting, "in the name of Dr. L. Ron Hubbard?" "the more I agree with Dr. L. Ron Hubbard, the more self-determined I become."

THETA-DETERMINISM IS--- BEING ONE'S OWN STABLE DATUM. Do you mind my repeating this? I feel that it is very pertinent!!

DYNAMICS.

From the viewpoint of Theta-Determinism, the reactive mind is on the 6th dynamic-- a thing that is part of MEST, a barrier in the game. When one looks at it Thetawise, it is just a vast accumulation of crud. That is all that it really means to Theta, as Thetan Determinism. It accumulates during the playing of a game. When a new game is to be started, it is thrown out, and the accumulation starts all over again. Its significances, its commands? What difference does it make? It is other determinism. Addressing its significances-- angrams, opterns, "careless of", witholds, psychoanalyzing GPMs-- that is accepting the bank as what the bank says that it is-- and is being the effect of the bank, playing pattycake with it.

WHEN THE BANK IS REGARDED WITHOUT SIGNIFIGANCE, AS IN THE RUNNING OF VACUUM CLEANING PROCEDURE, GPMs ARE FOUND, REDUCED. BUT THEY MAKE UP ABOUT 15% TO 20% OF THE TOTAL BANK CONTENT. They are far from the heaviest material found in Vacuum Cleaning Procedure. It is a 7th Dynamic, not a 1st Dynamic process.

We, as a 1st Dynamic, as this bodytime valence or personality, identify with the bank. The this bodytime personality of the average guy on the street is but an accumulation of his bank aberrations. Some MEST, or other force he considers greater than himself imposes itself upon him-- and he reacts. Psychotherapies, such as Scientology, make no distinction between the you as the this bodytime personality, and the You as Spirit-- Theta-determinism. The result is that the greater force of the 1st and 6th dynamics crowd out whatever there might have been of the 7th-- and Scientologists become less and less truly Spiritually motivated, the more training/processing they receive. By this, the oft repeated examples: Who is the "you" who did it, helped/failed to help, etc. thruout processing.

My point: THE PRACTICE OF THE SUBJECT MATTER HEREIN CONTAINED LEADS TO BECOMING MORE ONE'S SELF AS SPIRIT-- SEVENTH DYNAMIC. Dr. LRH talks about the same way, but every present Scientology practice but leads to the polishing up of the most controllable first dynamic which is guided by DR LRH, instead of

Beingness, as our own Seventh Dynamic. The Seventh Dynamic is thereby keyed out. THAT IS WHAT IS NOW TRANSPIRING.

Got a good one on me... Last summer, Red Shea sent out a form letter from Dallas saying that Dolores and himself were "going to do something for the first dynamic," but did not say what it was. Others and myself were strictly ??????? We went into figure-figure; we felt that if they were doing other than going into some more lucrative occupation, they would have said so. Later comes another form letter, saying that Dolores and he were going back again to St. Hill.

Dunkopf me!! Of course, going to St. Hill is doing something for the 1st dynamic. That is what I have been certain of, right along. Dr. LRH's Scientology is a therapy which operates only the 1st dynamic-- but when I got this blatant confirmation-- it sizzled right by me...for St. H. expected him to say 7th Dyn.

3. (pp. 1) DUPLICATION. Now, this presumes that you do have some space. You have. It presumes that you can mockup. You can. It does not presume that this, or any others steps will NECESSARILY be conscious to you, as a 1st Dynamic.

It does preclude comm, or a comm line, between 1st and 7th Dyn.; and an ability to distinguish between this comm and the other determined force and noise rumbling in from the bank. Clarity as referred to in Scientology and Scientology (the science, and the Huborg religion) facilitates this--a quiet mind. But, when the space is cleared, make certain that YOU occupy it.

This is the beginning in the action of 8-8008, (Ron, 1952) which is the reduction of the physical universe to zero; and from this zero, the creation of your own universe. This created universe is what I refer to as the Games Universe. Aberratively, it is cluttered up by reactive masses, symbols, GPMs etc., could, again get cluttered by Huborg symbols, fixations.

Most obviously, one does not reduce MEST to zero, or even anything in MEST. Its survival protection is in its complexity re: times, places, events. This does not hold re: the content of our own Games Universe.

4. is contingent upon the Thetan's ability to admire the duplicate, reduce it to zero. It is contingent upon the Beingness's ability to admire at all, also upon his ability to admire this specific subject. Ron's Admiration and Creative Processing of 1952-4 had the regaining of this ability as its purpose. A few of us could do these processes-- Step ones, they were called in them days. But even sometimes with us, and all of the time with most people the thinkingness of the bank-- like noise, static-- kept coming thru disrupting comm between Ourselves and the Body Personality. You see, when this comm is out, one has to be either one or the other. The MEST of the bank/Body Personality banged thru so forcefully, deafeningly that it became self-evident that it was necessary to clear some space in which to operate. So, by 1955, Ron decided that the sole salvation lay in the address of Thinkingness, only. With his announced intention to devote full attention to organization (Wash. June 1955 Congress) the transition from scientology to Scientology began in earnest. Address was therein shifted from the 7th dynamic to the 1st & 6th dynamics, and scientology became a Scientological therapy, and a religion. It has continued on this tangent ever since. It has gone so far adrift that it is now endeavoring to artificially synthesize the 7th Dynamic Operating Thetan, from the 1st Dynamic. The black side-- those who have identified with MEST seek to make machines to usurp men; seek to bring on reactive mechanism to usurp man. Dr. L. Ron Hubbard is so plausibly augmenting the 1st dynamic, that it can be masqueraded as the 7th dynamic.

Again, I refer to the Theta-MEST Theory of Ron's, 1951, Science of Survival. MEST wins, to the degree that it traps Thetans. This is MOST effectively done by, first, presenting a high order of truth, The able Thetans recognize this, and are attracted. You know, you do not attract flies with vinegar. The truth is then altered, and altered, and altered. The victims agree and agree and agree. All interest in real Thetan Determinism are gently quieted--"The more you agree with Dr. LRH the more Theta-determined you will be." At last, the victims cannot even discern the difference between the body personality/reactive bank, and themselves as the 7th Dynamic-- THE GOD WHICH EXISTS IN THEIR OWN UNIVERSE. They have no space of their own; DR LRH owns all wisdom, space, everything else. But, they ARE DR. LRH, so as the valence of DR LRH, they think they can be operating Thetans. Actually, they are operating valences. You as Theta-Determinism have NO dependencies anything any time, anywhere. "The more I agree with DR LRH, the more Theta-Determined I am." Nuts. Be a bait stealer.

An essential prerequisite for dis-entrappment is completely delineating, differentiating Dynamics and Universes. I am not saying this as something that can be easily accomplished quickly and easily. In one aspect, it is an ideal. In another aspect, it is like a road map. I hope to at least catalyze conceptual cognition, which will lead toward greater and greater understanding. I do hope that you will understand that Theta-Determinism is totally of your own initiation, volition-- not more and more complex, precise machinations, regimens in abject obedience to some other-determinism. You are the "Captain of your soul." But, if you do not distinguish between you as Captain(7th dynamic) and you as soul (1st dynamic), you have been as Ron used to put it, been fraternizing with the troops. What you do-- up to you. I just say, "Hey lookit" and hope that you will point your nose this direction. In that way, I do not involve myself with karma complications.

To again clarify: In highest truth, we ARE the 8th Dynamic...ALL. We ARE also a viewpoint of Theta. As such, we are individuation, unique, individual. As such, there is no other Being just like-- only similarities, differences. As such, we are creative, active-- we ARE each item on top side of Hubbard's Attitude Chart-- responsibility, truth, knowingness, etc. As "sparks of the Divine" we are minor/minute gods in our own right. We ARE as such to the degree that we CAUSE ourselves to BE such. This potential is Spirit-- 7th dynamic. It is not the effect of the laws of karma, good/evil, etc. The 1st dynamic is the this bodytime masquerade which is subject to various, sundry incidental agreements which we have made; which we made, but have been altered by other-determinism but are still enforced by other-determinism, or have been totally imposed upon us. As 7th dynamic, we are Ethical. As 1st dynamic, we are moral/im-moral.

6.--10., pp; 1, refers to the complete Knowingness to Unknowingness scale to which I have referred in past issues. This will be found on pp. 5. We will now discuss each level, and discuss their inter-relationships.

Please understand that the sequence on pp. 1 is but a pattern which would, ideally precede a Theta-Determined action. Even optimally, it does not always run the complete cycle. A person might be reading, simply evaluate, nothing more. He might look, and just Know the answer.

Of course, with homely sapiens it may be any pattern flitting thru the reactive bank, or it may just be a simple reaction. It may even start out nice and analytical-- then in moves a big fat mass, and the bank pyrotechnics. Or, - it could be any combination of these, or same again extended into most any complexity one could imagine.

sublimate the lower half of this scale. They represent a wider range with many variables, within the choice limits bounded by the "sacredness" of MEST and status quo. Like, Ron was a great right fielder, but since he started heading south, he has been chasing foul balls down the right field foul line. But really, Dr. LRH's right field bull pen is not the whole fun playing field.

You know, I think it is real, nice here in center field. Consider this an invitation to take a look.

--But now, to get real practical about this... Even Ron did not approve of irreversibly changing MEST. In Phila. Doc. Course he had you doing all sort of things with mockups in your own universe-- but not with MEST...It is sacred. Presently, he has gotten to where one assumes sufficient cause over masses to shift them in space-- move them out. But, alter them irreversibly so that they cannot key in again? Never. It is against his religion.

ACTION/REACTION. Not enough distinction is made herein. A reaction is the result of a MEST cause. like finger on red hot stove. An action is created by some elements of evaluation, decision, command, action. Like right now, I have an urge to go into the other room, read. I did not decide on this. But, I did decide that I was going to get this out in time to staple/stamp it while watching the football games over the week-end on TV. So, I continue to act.

EFFORT/THINKINGNESS. Ron has called Thinkingness a substitute for action. Even tho one might analytically decide on something, if he does not issue the command to execute this act, he will revert into thinkingness. No action takes place unless you cause it. Evaluation and decision will not effect it unless the command for action/no action is given.

As covered in another issue, what was referred to as Thought-Emotion-Effort is herein-- Thinkingness, Misemotion, with 1.0--0.0 on the misemotion scale as Effort.

Similarly, a precise differentiation between Thinkingness and Thought is in order. Evaluation has to do with direct confrontation of the thing itself. Any comparison, similarities, differences; what it is; what it is not etc., are, theoretically, sought for. Theoretically, because we all have a degree of reactivity, which will bring things in without invitation. But, at the level of evaluation, these facsimiles, themselves are evaluated, similarities to present determined.

As Ron brought out in Dianetics, altho any reactive level can cause a reaction, these generally gets bounced thru thinkingness a bit, are extremely slow compared to analytical action-- despite the greater complexity of the latter. About same difference as between an old steam threshing machine and an electronic computer.

Ron referred to symbols as mass meaning and mobility. The "meaning" in a fixed symbol is in terms of thinkingness. It is more accurate to use the word significance, rather than meaning, tho either would do. Thinkingness is a conSIDERation, does not involve direct confrontation. It is something about the subject, and this "something about" is treated as if it were the thing itself.

Like in Huborg processing, the "thinkingness" only is addressed. The aberrative symbol is capable of mobility-- so it moves out, usually onto another chain. Huborg calls palliation "as-isness."

To apply thinkingness, just saying more think ABOUT the subject is merely playing a game of thinkingness. It is an attempt to solve the problem of the

reactive bank by using data of similar magnitude. Just like the mentioned (#54) shell game, the answer lies in the understanding of, the DISSolving of the game as a solid. A sure way to further descend on the spiral is to try to solve MEST using data of comparable magnitude. One can dissolve the aberrations of MEST only by creatively, Theta-determinedly operating in one's own universe. Present Huborg operating valence, 1st dynamic procedures serve but to make the reactive machine more efficient, well lubricated, increase one's identification with it-- keys out true Thetan Determinism.

EMOTION-MISEMOTION. No one ever acts directly on a purely analytical basis, without first locating himself somewhere on the Attitude Chart, and first deciding. One can BE more than himself as an individuated viewpoint, KNOW, LOOK, even to some degree, EVALUATE. But, tho it may be theoretically possible, a Thetan in a body simply does not decide without locating himself . . . on the tone scale . . . the THETAN SCALE RANGE (Ron's 8-80, pp.51). Please consider the accompanying text, ch. 16, a part of what is herein written. To it, AMEN.

The THETAN PLUS BODY SCALE, is the scale of misemotion. The difference: When a danger arises the decisions productive of the EMOTION of fear cause an optimum action; should the MISEMOTION key in, one would freeze-- as a rabbit.

Thinkingness comes off in Vacuum Cleaning Procedure, usually as a gas. Misemotion comes off usually as a liquid. Symbols are solid. The "usuallies" are because, often thinkingness is ensconced in misemotion liquids/ symbol solids. Thinkingness is meaning, (significance), mobility. Misemotion is fixed significance; and Symbols, as per Ron are; mass, meaning, mobility. The three also constitutes the "thought-emotion-effort--emotional curve. It is really, thinkingness-misemotion-symbols.

THOUGHT-SYMBOLS. Symbols in the bank are condensed aberration. Thought is the essential of non-aberration; the essential of Theta-Determinism. It is highly comforting to address the transient, elusive bothersomes which constitute thought, only. It is a sweet and dainty palliative to address the thought in a mass/symbol--and cause it to move away from attention areas. But, this is using data of comparable magnitude to solve it, i.e. thinkingness, itself. This in no way increases ability BUT IS MOST VALUABLE IN THAT IT SETS UP A SITUATION WHEREIN SPACE IS MADE AVAILABLE IN WHICH TO OPERATE-- PROVIDED THAT YOU ARE THERE TO OPERATE, NOT AN LRH VALENCE.

EVALUATION/THOUGHT is confrontation. You can say all sorts of nice or nasty things about it with intention, and it may move away. You might put it yesterday, or uncle Theobold's pocket and it will probably further condense, get tougher to handle- but it will move away... and the Huborian will say that it is as-issued.

In Vacuum Cleaning Procedure, we have found that ANY Symbol in the bank is consistent of many related solids occupying the same space. They have a command over the being-- but in almost all instances, the command/compulsion is NOT available at conscious level. As the law of universes is violated with each solid as it emerges..The solids flow off in this irreversible process.

As the Vacuum is pushed thru the space of the solid-- after the last one has been reduced-- still more solids will be found. These are indicated to be inhibitions, shalt nots. It is these which depreciate ability. Any claim that Thetan ability will be increased without even addressing, confronting that which debilitates the Thetan is utterly false. This is not an experimental premise. I have been using it for 4½ years-- on those who are ready. Are you? Write me and let me know. How far and hard do I reach? Just about this far.

55-- 8

Doggone, I did it again. Ready to talk about knowingness and Lookingness-- and I am on the outside wrapper sheet, where it might disturb people. Let's see--would it be kibitzer emptor, or caveat kibitzer? We skip it.

Anything below Symbols flows right off as gucky, directly. In fact, a lot of this is immediately available-- and leaves when some CCH, SCS or similar process is run.

But, to simplify: With new data-- knowingly resist it, copy it, admire it, mock it up again--- then agree/disagree with it. You will then own it.

HAPPY HOLIDAYS----

Subscription: \$2/epoch-- 3 issues: \$5/eon, 51 issues.
